## CAREER OBJECTIVE

Want to work in an agile and thriving company that utilizes my ability and efficiency. I'm a highly dedicated and self-taught professional who likes to solve problems.

## SKILLS

**Expertise**: HTML5, CSS3, Bootstrap5, Tailwind,  JavaScript, ES6, React, Rest API.
**Comfortable**: Node JS, Express JS, MongoDB, React Query, JWT.
**Familiar**: With Material UI, Payment Gateway, Next js, React Native, and Axios.
**Tools**:  Git,  Chrome  Dev  Tools,  VS  Code,  Figma,  Netlify,  Firebase,  Vercel.

## PROJECTS

**Used Product Resale Market**-  [Live-Site](#) | [GitHub-Client](#) | [GitHubServer](#)
● A Resale service app with different User, Seller, and Admin dashboard functionality where users are able to order services and checkout with their personal information and Credit card details.
●Use MongoDB for storing data, Stripe for payment & basic CRUD operation done on the server site.
●Developed different dashboards for admin, seller, and general users. Admin can manage all users, sellers add or delete, and can make a new admin.mail:abc@efg.com pass: abc@efg.com
**Used technologies**: React, Stripe, Node.js, daisyUI, tailwind CSS , react-hook-form, react-hot-toast, react-query,  Firebase, MongoDB.

**Cleaning Service**- Online service website: [Live Site](#) | [GitHub-Client](#) | [GitHubServer](#)
● Developed different dashboards for admin and general users.
● Used MongoDB for storing data, basic CRUD operation done in the server site, implemented authentication system in firebase. Users can add services and delete their services from the database.
● Admin can manage all the orders, add or delete services, can make a new admin.
**Used technologies**: React, React Bootstrap, Node.js, Express.js, MongoDB, Firebase, Vercel.

**Educational Platform**- [Live Site](#) | [GitHub-Client](#) | [GitHubServer](#)
● It is an educational platform with some features and the project was taken to implement the react-router for routing system in authorization and authentication.
● Allowed users to register themself as a student, see course details.
● Users can download course details as pdf and only logged-in users can parse courses.
**Used Technologies**: React, React pdf, React Bootstrap, Firebase, vercel.
